**Description**

The website used by Faculty of Graduate Studies (FoGS), Graduate Education Analysis and Research (GEAR), shows data by calendar year (January-December), inclusive of the two convocation periods - May and November. This concept of a calendar year presentation has a fairly long-standing position. Since Doctoral (and Masters) students don't immediately graduate upon finishing their studies, there is no definite need to make the connection between academic (Sep-Aug) or registration (May-Apr) periods.

Person with lead responsibility for this metric: Associate VP Research, VPRI  
Data collection will be from: Faculty awards coordinator, FoGS  
Date: Collected for each March 1<sup>st</sup>, hence these numbers are normally available in March each year.
