3-Year Trend of Number of UBC Awarded Vanier Scholarships

Source: FoGS

3-Year Trend of UBC Share for Vanier Scholarships

Source: FoGS

**Description**

- The Vanier Scholarships represent the top ranked Doctoral students and are open to international students as well.
- Internal review process selects top candidates from the total applicants' pool and forwards to Ottawa.
- The 'National success rates' column (included in past years' metrics) has been removed. This is because only the 3-year quota amount given to other universities have been revealed, with a set anticipated number of awards of 55 per agency, totaling a maximum of 165. The actual number of nominees submitted by others universities across 3 years are not being revealed externally.
- Similar to the calculation of # Canada Graduate Scholarships metrics, the calculation for UBC Shares has been revised, and will no longer base on # UBC Nominees. It will now be calculated by dividing the total number of awards paid to UBC students over the total number of Vanier scholarships offered by the Tri-Council in Canada. In regards to calculating the UBC Share of Vanier scholarships given by each funding agency, as the Vanier agency does not published these detailed numbers, the detailed % will not be available, but only the total Share %.

Person with lead responsibility for this metric: Associate VP Research, VPRI

Data collection will be from: Graduate Awards Manager, FoGS

Date: Results are usually collected and compiled in April of every year.
